TECHNOPRENEURSHIP SEMINAR

SEMESTER II (2024/2025)

TECHNOPRENEURSHIP SEMINAR FINAL REPORT

SEMINAR TITLE:

EMPOWERING INNOVATION THROUGH EMERGING TECHNOLOGIES

DATE AND TIME: 26 JUNE 2025, 9:00 AM - 5:00 PM

LECTURER'S NAME:

PROF. MADYA DR. RAMESH K S @ MOHD ZAIDI BIN ABD ROZAN

GROUP: 13

NO.	NAME	MATRIC ID
1.	AINA NURAIN BINTI MOHD AROFF	B23CS0022
2.	AKMAL ASYRAF BIN AZZAMAN	B23CS0024
3.	LEE CHERN ERN	A22EC0302
4.	SYARIFAH DANIA BINTI SYED ABU BAKAR	A23CS0183
5.	MUHAMMAD FIRDAUS BIN MOHIDEEN ABDUL CADER	B23CS0056

SKUDAI, June 2025 — On June 27, 2025, the *Technopreneurship: Empowering Innovation Through Emerging Technologies* program energized Universiti Teknologi Malaysia's (UTM) N28a Faculty of Computing. Targeting aspiring techno-entrepreneurs, students and professionals in the technological industry, the day-long event created an exciting atmosphere of combining innovation, exploration and entrepreneurial spirit. Visitors were exposed to a carefully selected combination of seminars, showcase booths, fun challenges, and a lineup of food trucks, all of which created an eventful and interactive environment.

Registration for the Technopreneurship event on June 26, 2025 at N28a Faculty of Computing

The program was based on two main goals, to foster creativity using emerging technologies and to develop a great entrepreneurial spirit in the participants. Through the seminar and interactive booths, the program provided participants with a chance to see how exciting technology-oriented businesses could be and empower people to venture into the world of technopreneurship without fear. The participants were encouraged to explore innovative concepts, become exposed to hands-on experience, and learn about the skills needed to create next-generation startups.

The panel discussion was one of the highlights in the seminar with the main speakers being **Dr. Yeong Chee Fai**, CEO of DF Automation & Robotics, **Mr. Chan Weng Hun**, Head of

Cloud Core in Huawei GSRC Malaysia and **Russell Marland**, Senior Operations Director at TG Human Resource Management Sdn Bhd. This seminar would be conducted in Dewan Kejora, N28a. The panel will discuss matters related to innovation empowerment via the emerging technologies, companies in the industry will share tips and success stories that can give a hope to next generation technopreneurs. The discussion will allow the participants to learn more about the role of innovative technology and entrepreneurship in influencing a change that matters in the modern fast-changing environment of digital technologies.

Seminar happening in Dewan Kejora, N28a

The Showcase session was one of the most important highlights of the seminar where a range of industry booths presented information on their most recent innovations, services, and opportunities. Among them was **Lattel Robotics**, which presented its educational robotics platform through a banner showcasing the Jupiter Robot and promoting AI application learning in areas such as education, research, training, and competitions. **Huawei Malaysia** participated with its Huawei Connected Campus initiative, suggesting a focus on campus engagement, digital skill development, and fostering student-industry collaboration. **MSC Cyberport** highlighted its commitment to innovation with the tagline “Working locally, innovating globally”. The stand highlighted their work on GovTech solutions and their flyers contained the Cybersolution technologies which means they worked in the area of government strategy technology and e-services.

Also present was **TG Recruitment Agency**, which encouraged students to explore job opportunities in various sectors, providing a potential gateway into the workforce. Its brochure, *Optimising Workforce Excellence*, reiterated how the organisation was determined to improve the quality of workforce and how to sharpen recruitment practices. **Runcloud**, known for its cloud server management platform, contributed to the technical theme of the seminar by representing DevOps and automation in web development. **Nexscholar** participated with a focus on educational technology, likely showcasing tools and platforms designed to support digital learning and academic advancement. Even though our group was mostly involved in technical support, the availability of these industry booths really made the event as a whole more interesting as it gave us good exposure to practical applications, career options and latest technologies.

Lattel Robotics showcasing their Jupiter Robot

TG Recruitment Agency explaining their brochure titled "Optimising Workforce Excellence" to participants during the showcase

One of the panel shared his experience about implementing technology used while performing Hajj in Mecca.

Besides that, there are some talks on going at the Hyflex classroom in N28a. The panels shared some interesting talks such as how to implement technology into entrepreneurship or business, creating more business innovations. These talks are truly inspiring, encouraging students to think out of the box.

Foodtrucks are available at the event to replenish and serve food for everyone

Food trucks are also stationed as the event lasts for the whole day, providing food for everyone and tents are set up for places to rest.

Throughout the event, the student technical team encountered several on-ground challenges that tested their coordination and adaptability. With activities running concurrently across different locations such as Dewan Kejora, the Hyflex classroom and the exhibition area, maintaining smooth technical operations proved demanding. The team had to manage sound systems, projectors and internet connectivity all while ensuring minimal disruption to the seminar's flow.

One of the notable challenges was the need to troubleshoot unforeseen technical issues under pressure. For instance, brief audio dropouts and unstable connections required the team to act swiftly to maintain session continuity. Efficient teamwork and proactive communication were crucial in overcoming these hurdles. Despite their primarily technical roles, students also interacted with speakers and industry representatives, giving them real-world exposure to professional event execution and stakeholder engagement.

In conclusion, the seminar was not only a platform to explore innovation and entrepreneurship but also a valuable learning experience for the students. The challenges faced fostered stronger teamwork, quick decision-making and adaptability which are essential skills for both the tech industry and future entrepreneurial ventures. The success of the event reflected the collaborative spirit and dedication of all involved, leaving participants with lasting insights and inspiration to embrace the possibilities offered by emerging technologies.

Individual Reflection

Syarifah Dania • You

Reflecting on an inspiring and hands-on experience at the Technopreneurship Seminar 2025:

Empowering Innovation Through Emerging Technologies held at UTM Faculty of Computing.

On June 26, I had the opportunity to be part of the technical support team for this full-day seminar, working alongside my amazing group to ensure that everything from audio-visual setups to session transitions ran smoothly. It was a challenging role, but incredibly rewarding as we navigated real-time problem solving, multitasking across venues and maintaining clear communication under pressure.

One of the highlights was the engaging panel discussion featuring renowned industry leaders:

- Dr. Yeong Chee Fai – CEO of DF Automation & Robotics
- Mr. Chan Weng Hun – Head of Cloud Core, Huawei GSRC Malaysia
- Mr. Russell Marland – Senior Operations Director, TG Human Resource Management

Their insights into how emerging technologies drive innovation and shape entrepreneurial ventures were truly eye-opening.

The showcase booths added even more depth to the event, with contributions from companies like Lattel Robotics, Huawei Malaysia, MSC Cyberport, TG Recruitment Agency, RunCloud, and Nexscholar, giving students a closer look at how innovation is applied in real-world settings.

Despite the behind-the-scenes challenges like technical glitches, tight timelines and the need to adapt quickly, it was an unforgettable learning experience that strengthened my teamwork, communication and event coordination skills.

Thank you to our lecturer, Prof. Madya Dr. Ramesh K S @ Mohd Zaidi bin Abd Rozan and all the organizers and participants for making this seminar a great success.

Here's to more opportunities that combine learning, leadership, and innovation!
